

# Have you come for an appointment with a doctor?

**Are you taking medication? - If so read on...**

- The doctor will explain why you are taking medication and what the benefits might be.
- The doctor will give you information about any side effects. This will be printed off for you.
- You should be involved in making a choice about medication but this may not always be possible.
- The doctor will tell you when the medication will be reviewed.
- The doctor will tell you what to do when your current prescription runs out.

**Do not go home today if you have questions about your medication. Please ask the clinic administrator or receptionist to let you have a few extra minutes with the doctor.**
